Bishal Mahat

Senior Developer / DevOps Engineer

Panauti-10, Khopasi, Nepal | 9843567895 | bishalmahat46@gmail.com

Profile

I have spent more than five years keeping important systems running: first the National ID database and enrollment network for the Government of Nepal, and now IT infrastructure for a media company. I started out building PHP and Laravel web applications, and in 2026 I completed 113 hours of DevOps training. I like turning messy manual work into something repeatable, writing down how it works, and helping the people around me get better at it. I am now looking for a senior role where I can build and release software, look after pipelines and environments, and guide a development team.

Core skills

- **Development:** PHP, Laravel, Python (Django), ASP.NET, C/C++, MySQL, database design, web application structure (MVC)
- **DevOps and delivery:** CI/CD pipelines, automated builds and deployments, release approvals, rollback and recovery planning, runbooks
- **Infrastructure:** Servers and networks, system monitoring, capacity planning, backup and restore, incident handling, vendor coordination
- **Security:** Protecting sensitive personal data, encryption, data protection rules, access control, security fixes
- **Team and delivery:** Mentoring and training staff, handover notes, working with project and operations teams, clear progress reporting

Experience

IT Officer, Annapurna Media Network

Jun 2026 to Present

- Run the company’s servers, network and staff systems so daily broadcast and office work does not stop.
- Watch systems proactively and do preventive maintenance, so most problems are fixed before staff notice them.
- Plan capacity and recovery: backups, test restores and business continuity steps.
- Work with vendors and internal teams to close incidents, and keep records of what was changed.

MIS Officer, Shree Distillery Limited

Dec 2025 to May 2026

- Built and maintained the management reports that managers used to make operating decisions.
- Supported the company network, infrastructure and users, and handled incidents as they came up.
- Kept backup and recovery routines running to protect business data.

NID System Support Engineer, Department of National ID and Civil Registration, Ministry of Home Affairs

Nov 2020 to Nov 2025

- Supported a national identity system used for citizen registration and verification, solving errors and access problems so the database stayed available.
- Managed a secure database of personal identity data and worked with government IT teams on data protection and security measures.
- Set up data backup and recovery solutions that prevented data loss and kept the service running.
- Installed, configured and maintained enrollment hardware (fingerprint and iris scanners, cameras, signature pads, card printers) across enrollment centers.
- Ran diagnostics and preventive maintenance to reduce downtime, and worked with vendors on repairs and warranty claims.
- Trained enrollment center staff on using, calibrating and troubleshooting devices, and kept an inventory log to move equipment where it was needed.

PHP Development Trainee, Broadway Infosys

Nov 2018 to Feb 2019

- Built websites with PHP, MySQL and Laravel and learned to structure applications using MVC frameworks.

Selected projects

- **Green Commerce**: eCommerce web application built with PHP and Laravel (final year).
- **Handwriting Recognition System**: AI project built in MATLAB.
- **Hotel Reservation App**: Windows application built with .NET.
- **Bakery System**: case study application built with Python and Django.

Education and training

- **DevOps Training**, Broadway Infosys: 113 hours, Apr to Jun 2026 (Certificate No. B46061000, ISO 9001:2015 certified institute).
- **BSc. CSIT**, NIST College. Coursework: data structures, DBMS, operating systems, software engineering, computer networks, cloud computing, AI.
- HSEB, Indreshwor High School. SLC, Shree Bal Adarsha Secondary School.

Interests

Math and science, aviation, and keeping up with new IT and AI tools. Worked as a monitor for the innovation science theory and practical lab.
